TOOL TYPES

OPEN-ENDED HANDLES — Handles that are open at one end and have no built-in holes or loops.

WAISTED TOOLS — Tools that have a built-in 'waist'; a thin section between two thicker sections.

MOULDED GRIPS — Shaped and waisted rubber grips found on small hand tools.

ROTATING TOOLS — Tools that require rotation to perform their function.

CAPTIVE HANDLES — Handles that form a natural closed loop in the structure of the tool.

CAPTIVE HOLE — Holes preformed into the body of the tool.

MULTIPLE HANDLES — Tools that have multiple handles and no built-in 'waist'.

SHAPED TOOLS — Tools that are preformed with a tapered mid-section.

INSULATED TOOLS — Non-conductive tools for maintenance and electrical work.
