Factory & Warehouse Working At Height Training

Factory & Warehouse Working At Height Training | ½ Day

Factory and Warehouse Working At Height Training

Who Is This Course For

This course focuses on how to work at height in and around a factory and warehouse. The course is designed for anyone involved with working at height, whether operating equipment, servicing, or managing and controlling those people working at height in this environment.

What Are The Objectives Of The Course

To enable delegates to identify the need for height safety equipment where necessary, depending on the nature of work and access requirements.

Where height safety PPE equipment has been identified as being required delegates will learn how to select and use the appropriate equipment safely.

The course will consider difficult working scenarios, where anchorage limitation and height clearance restrictions make it critical to have the necessary competence to work safely.

Learning Outcomes

After the course delegates should be able to work safely at height, having a sound theory of the dangers and risks of working at height, and have the practical skills in using the appropriate height safety equipment correctly and safely.

This will lead to the candidates being certificated competent to work safely at height in a factory or warehouse environment.

Delegates will have a thorough and complete understanding of what is required to work safely at height and achieve better practical standards of health and safety in the work place.

Level 1 Working At Height Training Introduction

This course focuses on how to work at height in and around a factory and warehouse environment, incorporating the safe use of height safety equipment as necessary, depending on the nature of work and access requirements.

The ability to gain access and work efficiently at height whilst navigating the hazards associated with this usually difficult working scenario, where anchorage limitation or height clearance zone restrictions make it critical to have the desired level of applicable knowledge and competence, is essential to work safely.

During these typical activities physically climbing at height can be involved, potentially putting the operator at risk of falling. Therefore putting people to work in this environment deems that it comes under the legal requirements and duties of the work at height regulations.

Your Ticket To Safety

Leading Edge delivers fresh, dynamic and enthusiastic learning presentations with practical applications to make the experience as enjoyable as possible. This will ensure the course is memorable and allows candidates to easily digest the safety information.

On successful completion of the course and examination, candidates will be issued with a Leading Edge Photo ID card and certification as proof of their accomplishment and safety awareness. Plus this course entitles you to our free site safety 'Service Pack' program.

Why You Should Feel Happy To Use Us

Every year we have more than 5,000 people complete our recognised training, not only to gain the certification they need, but also the competence to work safely that comes from our specific construction tailored training.

We Guarantee Our Training Free Licence Card Support

If you discover an operative, who was previously trained by us, currently working in an unsafe manner or not adhering to safety practices then you can implement the card licensing system and remove their card authority by cutting off one of the four corners of their licence card.

Following this step, you can then contact Leading Edge and a technical support member will arrange to come on-site and provide additional instruction to the operative and offer site management support Free of Charge. This will help the staff regain the skills they need to get back to their job and work in safe environment.

Factory & Warehouse Working At Height Training

The course is broken down into key subject areas all relevant to the nature and scope of the work concerned. Concepts such as the critical importance of correct harness fitting, how to use specific equipment providing necessary levels of access, understanding anchorage requirements and suitability when working on different structures, along with general applicable fall protection knowledge on what you can and can't do when working at height, and what you can and can't do when it comes to equipment for application suitability.

Areas Covered & Types Of Height Safety Work

- Racking (Erecting, Dismantling & General Working Access)
- Working Platforms (Fixed & Mobile)
- Service Voids, Ducting & Pipe Work
- Plant & Machinery Access
- Gantries & Suspended Lighting
- Loading Bays, Lorry Loading
- Goods Lifts (Car & Plant Access) & Internal Crane Structures
- Mezzanine Floors & Stairwells

Factory & Warehouse Working At Height Training | ½ Day

Factory & Warehouse Working At Height Training

The course focuses on what's critically important to become competent using height safety equipment appropriately in order to create the safest working environment possible.

Theory (3 Hours)

The theory part of the course is customer specific focusing on the access sequence requirements and restrictions, advising on temporary methods of work based on height requirements specific to the work needed to be undertaken.

Course Introduction

Statistics / safety awareness

Group exercise - harness workshop

Specific safety considerations for factory and warehousing

Suitability of height safety equipment for the use within this area

Basic elements - Safe working procedures, equipment principles / operator considerations:

- Harnesses
- Inertia reels
- Lanyards
- Restraint equipment
- Connectors
- Fix and temporary systems

Methodology - working in fall arrest / work positioning / restraint, specific suitability vs. equipment requirements and restrictions

Anchorage - propriety devices vs. application suitability & access

Group exercise - inspection & care of kit workshop

Multi question examination paper

Photo ID

Practical (1 Hours)

The group is taken out on to the specific areas for practical training and practical assessment of their working at height capabilities. After which there is a chance to look at any problems that our instructors may be able to solve, or give general advice as necessary.

Practical group exercise to be carried out on the client desired location for direct association with scope of works.

Group informal risk assessment

Method of work and access

Equipment selection

Anchorage considerations, location & set up

Practical safe working training

exercises - practice and evaluation

Instructor live guidance - walkabout - review of site issues

What Makes This Course Different?

This Height Safety training course has been developed through our extensive knowledge and experience.

By understanding the scope of works, the relative exposure and available access, and the capability of the typical person. Combined with also the fact we have specialist instructors that train this course, and being additionally qualified as plant instructors under NPORS, CITB, and IPAF whilst not forgetting they are Leading Edge height safety instructors. Makes Leading Edge and this course unique.

We Train At Your Location, Solving Real On Job Issues.

we train at your location, in real working conditions, solving real on the job problems associated necessary access requirements. Our course's major strength lies in their direct association with the actual area the candidates are working afterwards.

On-site training is the key to reducing disruption and minimising lost time for employers. It also allows Leading Edge to apply specific training and advice to incorporate the basic concepts, to ensure the candidates understand the theory and practical elements of the course. By running the training at your location also resolves equipment selection, use and suitability issues.

Factory & Warehouse Working At Height Training | 1/2 Day

Trade Specific & Tailor Made Training Courses

Training is not just about 'Generic Principles', to us it's about improving site safety, awareness and productivity through workplace, trade and job specific guidance.

Our courses are tailored to your place of work, the job being done, sequence of work, restrictions and equipment suitability.

This training has direct association and adds real value.

Every Customer Is Unique

For example, where we need to consider the work methodology, processes, height safety and equipment requirements for a particular job, we take into account the nature of the job being done and the surrounding environment, access and restrictions and then provide specific guidance for how to do the work safely.

Our courses highlight good and bad practice and what you really need to 'know and do' to be safe while working at height.

Understanding Your Needs

We train every day at job locations and we understand how our customers want to work. We adapt and tailor our training to your specific needs so you can work safely at height and improve your employees confidence and efficiency given your work and trade requirements.

We don't only train in our own equipment but whatever you are currently using, including inertia reels, alsipercha, lifeline, restraint systems and rope access etc . Making sure that the equipment you are using it is used appropriately and safely.

Trade Specific

Courses are available for the following industries:

- Airline Industries
- Environment
- Utilities
- Oil and Gas
- Process and Chemical Plant
- Telecommunication
- Military
- Factory
- Plant and Machinery
- Roof and windows
- General worker at height
- Demolition
- Inspection at height
- Mechanical and Electrical
- Temporary Works
- Scaffolding and Towers
- Steel worker
- Powered Access
- Construction

Tailor Made Training Courses

Some customers require something a bit special. They like our courses so much they asked Leading Edge to tailor them exactly to their specific needs.

Pricing Information

Location: Client's Site

Our training is job specific and so in order to provide the most effective training we deliver courses on-site. We provide direct training at your location both nationwide and internationally. So wherever you are, we can deliver the training courses you need.

Duration - 1/2 Day (8.30am to 1.00pm)
