Management Working At Height Training | 1 Day

Management Working At Height Training

Who Is This Course For

This working at heights course has been designed for management, safety personnel, supervisors, project organisers and anyone who has a responsibility to conduct, control and monitor working at height or make contributions towards fall protection in their workplace.

The content is primarily directed at management but it can also be used to assist those looking for formal advanced understanding in height safety principles within a trade, task and work environment.

What Are The Objectives Of The Course

This course will provide delegates with the knowledge and confidence in their skills to be competent to manage the height safety related issues that occur within their working environment.

Learning Outcomes

After completing this working at heights management course delegates will be able to:

- Have a thorough and complete understanding of required legislation.
- Be confident planning, organising and supervising work at height.
- Have the skills to solve and implement appropriate measures insuring correct work activity, methodology and management controls.
- Competently manage people and their environment when working at height.
- Achieve better practical standards of health and safety in the work place.

We Train At Your Location, Helping You Solve Real On The Job Issues.

On-site training is the key to reducing disruption and minimising lost time for employers. It also allows Leading Edge to apply specific training and advice relative to your actual workplace.

Working At Height Management Course Introduction

This advanced management course gives an in-depth knowledge around the key areas of working at heights, providing delegates with a complete overview of what is necessary to work safely at height.

From legislation to application delegates are taken through current legislation and how it impacts on their place of work.

Delegates are then guided on how to discharge their legal duties by focusing on the specifics that are relevant to the scope of work, activities and environment, including the techniques, understanding and skills required in managing people working at height.

Any workplace using fall arrest equipment can be potentially at risk of accidents if not properly managed. Careful attention needs to be given to the specific nature and scope of work being done, access and equipment suitability.

Candidates completing this working at heights course will be competent to make informed decisions with regards to planning, through to implementation and control of their work at heights activities.

Why You Should Feel Happy To Use Us

Every year we have more than 5,000 people complete our recognised training, not only to gain the certification they need, but also the competence to work safely that comes from our specific construction tailored training.

Your Ticket To Safety

Leading Edge delivers fresh, dynamic and enthusiastic learning presentations with practical applications to make the experience as enjoyable as possible.

This will ensure the course is memorable and allows candidates to easily digest the safety information.

On successful completion of the course and examination, candidates will be issued with a Leading Edge Photo ID card and certification as proof of their accomplishment and safety awareness. Plus this course entitles you to our free site safety 'Service Pack' program.

We Guarantee Our Training Free Licence Card Support

If you discover an operative, who was previously trained by us, currently working in an unsafe manner or not adhering to safety practices then you can implement the card licensing system and remove their card authority by cutting off one of the four corners of their licence card.

Following this step, you can then contact Leading Edge and a technical support member will arrange to come on-site and provide additional instruction to the operative and offer site management support. This is a part of our **FREE** customer aftercare support for more information visit the Service pack information: leadingedgesafety.co.uk/free-fall-protection-gs.php

This will help the staff regain the skills they need to get back to their job and work in safe environment.

Management Working At Height Training | 1 Day

Working at Heights - Course Content

This course provides a detailed look into the relevant issues surrounding working at heights as a whole.

It will help assess the nature of risks at their job locations when working at heights and determine the best methods for providing a safe environment.

Focusing on the nature and level of access required, and the safety precautions specific to these issues. Consideration will be given to the scope of works and the appropriate equipment selection which will affect the suitability of chosen method of fall protection.

The combination of our practical and theory course content has been developed to reinforce application specific knowledge, to further cement delegates competence, building on experience and confidence.

Theory (6 Hours)

This working at heights course is about options and selecting the most appropriate height safety methods based on available access through to equipment suitability. The hierarchy of safety provision will be considered.

Delegates will look at minimising exposure, while giving consideration to using fall arrest, work positioning, restraint, fix and temporary systems.

Practical (1 Hour)

Management are ideally taken on-site for practical site and equipment specific training, followed by a practical assessment of their competence. This provides management with the chance to address any site problems, issues or concerns which the trainer will be able to help in providing there and then local guidance.

The combination of our practical and theory course content has been developed to reinforce management's application knowledge, to further cement delegate's competence, building practical experience and confidence.

The training is directly relevant to your working environment, making it specific, focused and effective.

We utilise strong visual presentations including equipment demonstrations, group exercises and activities in order to fully ensure we engage all the delegates in the training course and maximise information retention and preventing skill fade.

What Makes This Course Different?

The course strength lies in the tailored training experience. The direct association with the job, scope of work being done, and the environment in which employees are working, makes the training directly relevant and valuable.

Learning only what's important to you, essentially what you can and can't do when managing working at heights, and what you can and can't use when it comes to the selection, suitability and operating height safety equipment.

Through open, honest and in depth discussions we can ensure delegates achieve the aims and objectives of the course, and be happy to fully deal with employees effectively when putting people to work at height.

Why You Should Feel Happy To Use Us.

With more than 50 years of experience in technical height safety training and products, we have determined not only to provide the best fall protection and height safety training possible, but to also continuously develop new ideas, further our technological expertise, understand and implement new techniques and to repeatedly set higher standards of safe working at heights.

We believe that this marks us out as the Leading Edge of height safety, giving you the confidence to now you're getting the best.

Don't Just Take Our Word For It

We have received feedback from many of our customers who have reported that our training inspires greater levels of confidence in the operatives working at height, as a result operative's work more safely and efficiently.

Management Working At Height Training | 1 Day

Trade Specific & Tailor Made Training Courses

Training is not just about 'Generic Principles', to us it's about improving site safety, awareness and productivity through workplace, trade and job specific guidance.

Our courses are tailored to your place of work, the job being done, sequence of work, restrictions and equipment suitability.

This training has direct association and adds real value.

Every Customer Is Unique

For example, where we need to consider the work methodology, processes, height safety and equipment requirements for a particular job, we take into account the nature of the job being done and the surrounding environment, access and restrictions and then provide specific guidance for how to do the work safely.

Our courses highlight good and bad practice and what you really need to 'know and do' to be safe while working at height.

Understanding Your Needs

We train every day at job locations and we understand how our customers want to work. We adapt and tailor our training to your specific needs so you can work safely at height and improve your employees confidence and efficiency given your work and trade requirements.

We don't only train in our own equipment but whatever you are currently using, including inertia reels, alsipercha, lifeline, restraint systems and rope access etc . Making sure that the equipment you are using it is used appropriately and safely.

Trade Specific

All Leading Edge Working at Heights courses are available with greater emphasis for the following industries and trades :

- Airline Industries
- Environment
- Utilities
- Oil and Gas
- Process & Chemical Plant
- Telecommunication
- Military
- Factory
- Plant & Machinery
- Roof & windows
- General worker at height
- Demolition
- Inspection at height
- Mechanical & Electrical
- Temporary Works
- Scaffolding & Towers
- Steel worker
- Powered Access
- Construction

There are many more industries and trades than identified on this list. We have done this type of training onsite and for so long that we really understand your job requirements and can tailor our course to match your needs specifically.

Tailor Made Training Courses

Some customers require something a bit special. They like our courses so much they ask us to tailor them exactly to their specific needs.
